WORK EXPERIENCE

Software Engineer — Laravel Developer | BABVIP Creation Pvt. Ltd., Dehradun *Jan 2024 – Present*

- Architected and delivered RESTful APIs for Admin and Customer modules of aonegobasket.com (wholesale grocery platform), enabling seamless product browsing, cart management, and order processing for 1,000+ active users.
- Built end-to-end HRMS backend (Aug 2024–Present) covering Employee Management, Attendance Tracking, Leave Management, and Payroll Processing modules — integrated JWT authentication, RBAC, and Eloquent ORM, reducing manual HR processing time by an estimated 50%.
- Developed Uttarakhand Classified E-Commerce platform with category-based listings, seller dashboard, and mobile-first responsive UI using Laravel and Bootstrap, improving platform usability across devices.
- Engineered a service-based Chatbot module, Customer Enquiry system, and Login/Signup authentication for the BABVIP Developers website, improving lead capture and user engagement.
- Optimized complex MySQL queries using indexing, CTEs, and eager loading via Eloquent ORM, improving average API response time and reducing database load.
- Collaborated with frontend developers and project managers in an Agile environment, participating in sprint planning, code reviews, and daily standups.

PROJECTS

HRMS — Human Resource Management System | *Laravel, MySQL, REST API, JWT, Bootstrap*

- Designed modular HRMS backend with separate APIs for Employee, Attendance, Leave, and Payroll — supporting multi-role access (Admin, HR, Employee).
- Implemented secure JWT-based authentication and role-based access control ensuring data privacy across departments.
- Optimized Payroll module with automated salary calculation logic, reducing manual computation errors.

Wholesale E-Commerce Platform — aonegobasket.com | *Laravel, MySQL, REST API, Bootstrap*

- Built Admin and Customer-facing APIs for product catalog, cart, order management, and invoice generation serving live users.
- Designed normalized database schema supporting bulk product uploads, category hierarchy, and order tracking.

Multi-Vendor E-Commerce Management System | *Laravel, MySQL*

- Developed a vendor dashboard allowing multiple sellers to independently manage product listings, inventory, and payment invoices.
- Implemented vendor-level role permissions and isolated data access ensuring secure multi-tenant operations.

Inventory Management System | *Laravel, MySQL*

- Built real-time stock tracking and order management system with low-stock alerts, reducing inventory discrepancies.
